“ I knew Tom my whole career at Air Products and I have many memories of him. One of my earliest is when I was on the CDP (early career) program and Tom was GM for USA GenGas. In those days, I was young and having trouble getting a word in edgewise at meetings. I'll never forget that Tom realized I was getting talked over, and he paused the vociferous discussion when that happened so I could deliver my point and make sure it was integrated into the thought process. He was so gracious: he never made me feel inadequate about it and boosted my confidence by being supportive. I learned to make myself heard, but if Tom had not made room for my contributions at a formative time, I would have had a difficult time instead of a positive one. My heartfelt sympathies and prayers go out to his family at this time of loss. Tom will be sorely missed,

“ Known Tom for most of our careers at Air Products, and even worked for him on two occasions. One of the sharpest business minds I've had the pleasure to work with/for. However, got to know him a bit more after we retired. His passion for life and what he believed in, his family, spicy food (although he had to tone that down), tennis and attending the US Open, and much more. He will be sorely missed and way too soon. Our condolences and prayers go out to the entire family.
